

1 DELEGATE STORM: Mr. Chairman and Delegate
2 Singer, the idea back of this amendment is to recognize
3 the problem, that people on Federal enclaves have no state
4 government to serve them the way our Court of Appeals has
5 held in the Loeb case, and not only recognize it but to
6 adopt a uniform policy so that these people will have
7 state government, and to make it uniform as to all future
8 acts of cession while leaving flexibility to cooperate with
9 the Federal government to meet any special requirements.

10 If you would look over Article 96, you would
11 see that our approach has been an extremely haphazard
12 approach since 1791, Also, since Section 47 was adopted,
13 the Attorney General has ruled in the case of Dietrich, and
14 in the case of the National Institutes of Health, that
15 since 47 was not referred to in those acts of cession the
16 jurisdiction ceded in the case of Dietrich and NIH is more
17 exclusive than ever before, so the idea of having is in the
18 Constitution is to adopt a policy which says that we will
19 treat these people the same as other people living in
20 Maryland are treated.

21 THE CHAIRMAN: Delegate Singer.
